

# Freedom To Clean

Battery driven cleaning that offers greater mobility and flexibility

## Freedom To Clean Range

Battery driven cleaning offers greater freedom and mobility without the need for mains power as well as providing a safer environment as cable trip hazards are eliminated. Productivity is increased as the cleaning radius is unrestricted plus no need to change sockets for uninterrupted cleaning.

Nilfisk has introduced the Freedom To Clean range with two commercial vacuums and a micro scrubber dryer for optimum cleaning flexibility.

- Interchangeable batteries and chargers fit all machines
- Continuous cleaning as charging time is shorter than machine runtime

**Consistent cleaning**  
Fast battery charging in just 40 minutes enables continuous cleaning with the use of two batteries.

**Easy access to battery**  
The machines have easy access to the battery compartment making it quick and easy for the operator to change the battery.

### SC250 Micro Scrubber Dryer Sweep, scrub and dry in one pass

Part number: 9087380020

- Efficient cleaning with sweeping
- 34cm cleaning width (cylindrical brush)
- Runtime up to 40 minutes on a fully charged battery
- Fast charging in just 40 minutes
- 6 litre solution and recovery tank
- Two water/solution settings
- Out of water alarm

### VP600 Battery Tub Vacuum Cordless dual speed vacuum

Part number: 41600822

- Up to 60 minutes runtime on a fully charged battery
- Fast charging in just 40 minutes
- Power boost function for heavy duty cleaning
- HEPA Exhaust filter
- Dust bag capacity 10 litres
- Weight with batteries 10kg
- Best in class sound quality 56/61 dB(A)

### GD 5 Battery Backpack Vacuum Cordless backpack vacuum

Part number: 41600842

- Up to 60 minutes runtime on a fully charged battery
- Best in class charge time of only 40 minutes
- Optimal performance with boost function
- Dust bag capacity 5 litres
- Weight with batteries 8kg
- Sound pressure 60/65 dB(A)

**Simple to use**  
Only one type of battery and charger for all three machines so there is no confusion for staff of which battery / charger to use.

***Nilfisk have a strategy in place to try and standardise the lithium batteries and chargers used in machines to make it simpler for you the customer.***

Key features of our 36V lithium battery & charger:

- Safe to use
- Best in class runtime up to 60 minutes
- Capacity monitor on battery
- High performing charger - 40 minutes charge time
- Compact and lightweight chargers
- Interchangeable batteries and chargers fit multiple machines
- Continuous cleaning with two batteries
